OBJECTIVE

The Daman High Income Fund seeks to generate income along with achieving medium to long-term capital appreciation, by investing principally in securities of issuers located in, or deriving at least 50% of their revenue from the MENA region, South Asia or Turkey. The Fund may employ leverage, up to a maximum of 50% of the Fund's Net Asset Value, to enhance the returns from time to time.

STRATEGY

The Fund uses bottom-up fundamental factors when considering equity exposure focusing on companies offering dividend yields above the MENA region, Turkey or the South Asia region's median, as determined by the Discretionary Sub-Investment Manager. These positions will typically have an established history of paying consistent dividends, generate strong free cash flow and trade at attractive valuations.

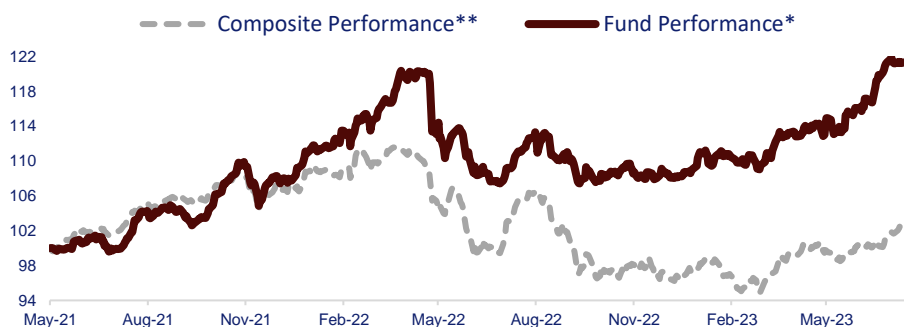

Fixed Income exposure is taken by a top-down approach and bottom-up approach i.e is driven both by changes in the macro environment factors such as interest rates, inflation, GDPs and fiscal deficits and particularly at a security level. In-depth fundamental research is carried out to understand the credit risk of each individual security and identify mispriced names.

INVESTOR PROFILE

The Fund is suitable for low beta investors seeking reoccurring income with a medium to long-term (3-5 years) investment horizon.

KEY RISK

The Fund may leverage its capital, while leverage presents opportunities for increasing the Fund's total return, it has the effect of potentially increasing losses as well. Accordingly, any event which adversely effects the value of an investment by the Fund would be magnified to the extent the Fund is leveraged.
