2. CERTAIN RISK FACTORS AND CONFLICTS OF INTEREST

Potential investors should be aware that an investment in the Master Sub-Fund, indirectly through the Sub-Fund, involves a high degree of risk and is suitable only for investors who fully understand and who can bear the risks of such an investment for an indefinite period and who can afford a total loss of their investment.

2.1 Master Sub-Fund Risk Factors

Defined terms used in this Section 2.1 shall have the meanings ascribed to such terms in the Master Fund Prospectus.

China Investment Risk

Various Sub-Funds invest in the Equity Markets and/or Debt Securities Markets of the PRC. There are numerous and varied risks associated with such an investment which are referred to as the “China Investment Risk”. Independent if a Sub-Funds invests in the Equity Markets and/or in the Debt Securities Markets of the PRC, the following risks are generally associated with such an investment, in the PRC:

FII Risk

A Sub-Fund may invest in securities and investments permitted to be held or made by FII under the relevant FII Regulations through institutions that have obtained FII status in China. In addition to the general investment and equity related risks of investments including in particular the Emerging Markets risks, the following risks should be emphasised:

Regulatory Risks

The FII regime is governed by FII Regulations. Certain parts of the Allianz Global Investors Group meet the relevant prescribed eligibility requirements under the FII Regulations and have been granted or might be granted a FII license. FII Regulations may be amended from time to time. It is not possible to predict how such changes would affect the relevant Sub-Fund. Rules on investment restrictions and rules on repatriation of principal and profits, imposed by the Chinese government on the FII may be applicable to the latter as a whole and not only to the investments made by the relevant Sub-Fund and may have an adverse effect on the Sub-Fund’s liquidity and performance.

FII Investments Risks

Investors should be aware that there can be no assurance that a FII will continue to maintain its FII status and/or that redemption requests can be processed in a timely manner due to changes in FII Regulations. Therefore, a Sub-Fund may no longer be able to invest directly in the PRC or may be required to dispose of its investments in the PRC domestic securities market held by the FII, which could have an adverse effect on its performance or result in a significant loss.

Regulatory sanctions may be imposed on the FII if the FII itself or the local custodian breach any provision of the relevant rules and regulations.

Such restriction may result in a rejection of applications or a suspension of dealings of the Sub-Fund. Should the FII lose its FII status or retire or be removed, the relevant Sub-Fund may not be able to invest in FII Eligible Securities, and the relevant Sub-Fund may be required to dispose of its holdings, which would likely have a material adverse effect on the Sub-Fund.

Limits on Redemption

A Sub-Fund may be impacted by the rules and restrictions under the FII regime (including investment restrictions, limitations on foreign ownership or holdings), which may have an adverse impact on its

performance and/or its liquidity. Currently, no regulatory prior approval is required for repatriation of funds from the FII. However, the FII Regulations are subject to uncertainty in their application and there is no certainty that no other regulatory restrictions will apply or that repatriation restrictions will be imposed in the future. Although the relevant FII Regulations have recently been revised to relax regulatory restrictions on the onshore capital management by FIIs (including removing investment quota limit and simplifying process for repatriation of investment proceeds), it is a very new development therefore subject to uncertainties as to how well it will be implemented in practice, especially at the early stage.

Any restrictions on repatriation of the invested capital and net profits may impact on the relevant Sub-Fund's ability to meet redemption requests from the Shareholders. In extreme circumstances, the relevant Sub-Fund may incur significant loss due to limited investment capabilities or may not be able fully to implement or pursue its investment objectives or strategies, due to FII investment restrictions, illiquidity of the PRC's securities market, and delay or disruption in execution of trades or in settlement of trades.

PRC Depositary Risks under the FII regime

Where a Sub-Fund invests in fixed income securities and/or eligible securities through the FII, such securities will be maintained by a local custodian pursuant to PRC regulations through appropriate securities accounts and such other relevant depositories in such name as may be permitted or required in accordance with PRC law.

The Sub-Fund may incur losses due to the acts or omissions of the PRC Depositary in the execution or settlement of any transaction.

The Depositary will make arrangements to ensure that the relevant PRC Depositary has appropriate procedures to properly safe keep the assets of the relevant Sub-Fund. The securities accounts are to be maintained and recorded in the joint name of the FII and the relevant Sub-Fund and segregated from the other assets of the same local custodian. However, the FII Regulations are subject to the interpretation of the relevant authorities in the PRC.

Any securities acquired by the relevant Sub-Fund held by the FII will be maintained by the PRC Depositary and should be registered in the joint names of the FII and the Sub-Fund and for the sole benefit and use of such Sub-Fund. Providing that the FII will be the party entitled to the securities, the related security may be vulnerable to a claim by a liquidator of the FII and may not be as well protected as if they were registered solely in the name of the respective Sub-Fund.

In addition, investors should note that cash deposited in the cash account of the relevant Sub-Fund with the relevant local custodian will not be segregated but will be a debt owing from the local custodian to the relevant Sub-Fund as a depositor. Such cash will be co-mingled with cash belonging to other clients of that local custodian. In the event of bankruptcy or liquidation of the local custodian, the relevant Sub-Fund will not have any proprietary rights to the cash deposited in such cash account, and the relevant Sub-Fund will become an unsecured creditor, ranking equal with all other unsecured creditors, of the local custodian.

The relevant Sub-Fund may face difficulty and/or encounter delays in recovering such debt or may not be able to recover it in full or at all, in which case the Sub-Fund will suffer losses.

PRC Broker Risks under the FII regime

The execution and settlement of transactions may be conducted by PRC Brokers appointed by the FII, as the case may be. There is a risk that a Sub-Fund may suffer losses from the default, bankruptcy, or disqualification of the PRC Brokers. In such event, the Sub-Fund may be adversely affected in the execution or settlement of any transaction.

In selection of PRC Brokers, the FII will have regard to factors such as the competitiveness of commission rates, size of the relevant orders and execution standards. If the FII, as the case may be, consider appropriate and if under market or operational constraints, it is possible that a single PRC Broker will be appointed, and the Sub-Fund may not necessarily pay the lowest commission or spread available in the market at the relevant time.

Defaulted Securities / Distressed Debt Risk

In certain cases, a Sub-Fund may acquire securities issued from an issuer that has defaulted on their interest/coupon payments (“Defaulted/Distressed Debt Securities”). The purchase of these securities exposes the Sub-Fund to the specific risk of Issuer Default (see Issuer Default Risk). In addition, an insolvency administrator is usually appointed to manage the defaulted issuer on behalf of the issuer’s directors. There is a high risk that the insolvency administrator realises the failed company’s assets, pays the liquidation expenses and compensates the creditors as far as the issuer’s remaining assets allow. This causes a long-lasting risk to the Sub-Fund that had acquired defaulted securities that these securities could potentially become completely worthless from an economic view. There is therefore a significant risk that the initial invest in the Defaulted/Distressed Debt could be lost entirely. If a security held becomes defaulted, the Sub-Fund may continue to hold the defaulted security until such time as the Investment Manager determines.

High-Yield Investments Risk

High-yield investments are Debt Securities that are either rated non-investment grade by a recognised rating agency or are not rated at all, but that would presumably receive a rating of non-investment grade if they were to be rated. In particular, such investments are normally associated with an increased degree of creditworthiness risk, risk of interest rate changes, general market risk, company-specific risk and liquidity risk than higher rated, lower yielding securities. Such increased risk may have an adverse impact on the Sub-Fund and/or the investors.
